ONE LESS THING TO WORRY ABOUT
WITH HYPOS TECH

CONTENTS

WHAT IS HYPOS TECH?

HYPOS Tech is specially designed for the Restaurant and Takeaway industry. Restaurants and takeaways equate to a large portion of the UK market, it is imperative that the industry has an effective management system.

We have created a complete EPOS Solution that works both online and offline with real time cloud-based synchronisation and backup; allowing you to manage your business better. By helping to reduce costs, improve cash flow and prevent the loss of sales, this system improves the speed and efficiency of transactions, allowing you to focus on your customers.

You can sign in from any EPOS devices and get real time sales reports according to item, staff or tender type, and search refunds and discounts.

HYPOS Tech will be an essential part of your business, marrying a professional touch with streamlined workloads.

We can also provide a payment system for you to manage all of your online transactions, and a complimentary website branded with your restaurant logo. All websites include an integrated online ordering system and are fully mobile responsive. Your customers will be able to access your website, place orders and make reservations directly with you through your very own HYPOS Tech terminal.

02

HYPOS PAY
MERCHANT SERVICES

As an additional service, we present **HYPOS PAY**. This service facilitates the taking of card payments, which allows your in-store customers the freedom to pay how they choose.

Get the edge on your competitors by offering a wider range of payment methods in a simple and secure way.

HYPOS PAY will help you get the lowest processing fees in the market to ensure your business prioritises profitability.
